Subject:	Building Staking
Type:	Planning and Development
Authority:	Approved by Council: December 13, 2012

Building Staking Policy

A building staking is required for any new residential and commercial construction in the Town of Lampman, as part of the Building Permit approval, to be carried out and completed by a qualified surveyor/surveying company contracted by the Town of Lampman. The Town of Lampman shall allow the surveyor/surveying company to stake the building using a six (6) inch (15 cm) buffer zone from the minimum setbacks required in accordance with the Town of Lampman Zoning Bylaw.

Any costs associated with obtaining the required building staking and resulting Real Property Report shall be the responsibility of the landowner.
