	Policy No. 300-27 Non-Smoking	

Town of Lampman

Policy No. 300-27 Non-Smoking

December 12, 2018

1. Non-Smoking

- 1.1. The Town of Lampman is committed to promoting a tobacco-free and smoke-free environment. All Town offices, storage units, enclosed equipment and vehicles (including personally owned vehicles used for work) shall be considered non-smoking environments.
- 1.2. Vapor or electronic cigarettes are not approved by Health Canada nor supported by the Canadian Lung Association as a method to quit smoking. Health Canada does not know the long-term health impact on individuals using these products and how they may impact people around the users of these products. As a result, the Town of Lampman is treating them in a similar fashion to traditional cigarettes and prohibiting them from use in the above non-smoking environments.
- 1.3. Cannabis is prohibited in the workplace.
- 1.4. All employees and contractors are expected to abide by all aspects of this policy while at work – whether on company premises, at a work site, or in transit between work locations or assignments. They are also expected to abide by this policy while off duty if they are on company premises, in vehicles owned or leased by the company, or in a personally owned vehicle used for work purposes.
